City Project No. 2008-48 Phase 2

Water Reclamation Plant Electrical Distribution Improvements

This project involves replacing the electrical switchgear at the City's Water Reclamation Plant, installing an emergency generator, and running new electrical conduits and cables between the new switchgear and existing motor control centers. The project is scheduled to bid in Spring 2015 with construction between Summer 2015 and Fall 2016.

If you need more information regarding this project, please contact Joel Waxdeck, Project Manager, at (925) 960-8129.
